Assignment 01 – Due 8:00 a.m. CDT Tuesday, September 6, 2016.

Purpose:

The purpose of this assignment is for you to introduce yourself to the instructor.

Instructions:

If you have not already done so, enroll yourself in this class on WebAssign.

Complete Assignment 01 on WebAssign.  There are no right or wrong answers. Do not be concerned if WebAssign does not award points for an answer.  This assignment will be manually graded by the instructor.  Full credit will be given on each question for which a reasonable answer is provided.

NOTE:  Assignments 1 and 3 will probably not be graded at all in WebAssign.  After these assignments have been graded the grade will be recorded in eCampus.  Programming assignments will be graded manually in WebAssign.  For programming assignments, the grader will indicate in the comment section of question 1 how many points have been deducted, if any, and the reason for the deduction.  Eventually, grades will be transferred from WebAssign to eCampus.  The official grades from which the course grade will be computed will reside in eCampus.
